

Town Engineer - Ayer Department of Public Works

Town of Ayer, Massachusetts is seeking a self-motivated, highly qualified applicant for the position of Town Engineer. The Town Engineer will report to the Director of Public Works. The Town Engineer will provide engineering and project management within the DPW, which has responsibility for over 41 miles of roads and associated water mains and sewers; two water treatment plants; 19 wastewater pumping stations and a 1.79 MGD tertiary wastewater treatment plant; a transfer station and two inactive landfills; MS4 permitted stormwater system; and consultation with other town departments, including subdivision and site plan review, construction monitoring, and street acceptance.

A broad background in municipal engineering is required, covering the relevant skills to support the infrastructure summarized above. The individual should have experience in roadway and drainage evaluation and design, water and wastewater utility assessment and improvements, solid waste management, stormwater management, and environmental permitting and regulatory compliance. Requires BS in civil engineering or related field plus 5 years of public or private sector engineering, project management and construction experience and EIT. PE Registration is preferred. Strong computer skills are a necessity including GIS, CAD, word processing and spreadsheet capabilities. Salary is negotiable DOQ.

For Application Package, download at <https://www.ayer.ma.us/about-ayer/pages/employment-opportunities>. Application and resume, in confidence, should be received by the Director of Public Works, 25 Brook Street, Ayer, MA 01432, DPWSUPT@ayer.ma.us no later than August 8, 2022. Ayer is an EO/AA Employer.
